How to Play

To simulate the real-life arcade, there are 4 different mini-games.

- **Basketball**
 - Score as many baskets as you can within the time limit
 - Use the arrow above the rim to check where the ball will be thrown to
 - Select the ball's direction by pressing the "OK" key once the arrow is on the desired spot
 - Press and hold the "OK" key to fill the power gauge bar, then release the key at the right time to score
 - The more you play, the less time you have, as the time gauge empties faster with each play
 - The backboard rotates 180 degrees, and moves front to back
 - The directional arrow and power gauge gets randomly faster for more challenge
 - Once the time gauge reaches zero, the game is over

- **Clay Pigeon Shooting**
 - You will get a certain number of the bullets when the game starts.
 - The muzzle of the gun aims to the center of the screen and 2 targets show up from the both sides.
 - Each target follows the each clay flying from the both sides.
 - Press the OK key for shooting once the clay is in target.
 - If you hit the clay correctly, the clay will break in pieces rewarding you with points.
 - If you fail to hit the clay or to shooting, you will lose bullets.
 - Once you use all the bullets you have, the game is over.

- **Football**
 - Each game has a time limit
 - Each teammate moves left and right onscreen
 - Choose which player to pass the ball to

- After anticipating the receiver's location, press the "OK" button to lock in pass location
 - Then press the "OK" button again to fill the power gauge and release the ball
 - Pass to the teammate closest to you and earn 1 point, pass to the player furthest from you and earn 2 points, and pass to both at the same time (as they overlap) and earn 3 points
 - Once the time gauge reaches zero, the game is over
 - Earn and collect Prize Tickets depending on your score
- **Boxing**
 - You start the game with a certain amount of Life Energy
 - There are a total of 9 possible areas on your opponent to punch
 - Each punch area corresponds to the 9 buttons on the phone's keypad
 - Press the correct corresponding key as soon as you see it highlighted on the screen
 - The longer the game progresses, the faster and greater number of circles become highlighted for greater challenge
 - Hitting the wrong button, or not pressing it fast enough after it's highlighted makes you lose Life Energy
 - Once Life Energy hits zero, the game is over
